

PAYAL MISTRY

Portland, OR | (541) 778-4746 | payal.mistry@gmail.com
payalmistry.com | github.com/payalmistry | linkedin.com/in/payalmistry

EDUCATION

Portland State University

Portland, OR

Bachelor of Science in Computer Science

Expected Graduation: June 2027

Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming, Programming Methodologies & Software Implementation

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, SQL, HTML, CSS

Frameworks & Libraries: React, Tailwind CSS, Vite, Node.js, Chrome Extensions API

Developer Tools: Git, GitHub, VS Code, Chrome DevTools, Netlify, npm, Make

AI & Cloud: Generative AI tools (Claude, GitHub Copilot), prompt engineering, AI-assisted development, AWS Cloud

Concepts: OOP, Data Structures, Algorithms, Dynamic Binding, Responsive Web Design, Version Control

PROJECTS

Personal Portfolio Website | *React, Tailwind CSS, Vite, Netlify*

payalmistry.com

- Designed and developed a responsive single-page portfolio from scratch using React 19 with Vite, showcasing projects, skills, and professional experience to technical recruiters
- Engineered a custom design system in Tailwind CSS v4 with 12+ theme-level CSS variables for colors, typography, and spacing, ensuring cohesive visual identity across all components
- Implemented advanced CSS animations including conic-gradient laser borders, glassmorphism effects, and staggered fade-in transitions using the `@property` API
- Built reusable React components (Navbar, Button, AnimatedBorderButton) with prop-based theming; deployed via Netlify with CI/CD from GitHub

Auto Calendar Chrome Extension | *JavaScript, HTML/CSS, Chrome APIs*

[GitHub](#) | [DevPost](#)

Norse Hacks Hackathon | Team Project

- Built a Chrome extension that parses selected webpage text into structured calendar events with ICS export for Google Calendar, Apple Calendar, and Outlook
- Integrated Chrome APIs (tabs, scripting, runtime messaging, downloads) for real-time data extraction and dynamic event creation
- Designed an interactive popup UI with form validation and error handling, improving usability and reducing user input errors
- Collaborated in a 3-person team using Git branching strategies, delivering a functional MVP under a 24-hour time constraint

Escape Room Manager | *C++, OOP, Data Structures | CS 302*

[GitHub](#)

- Designed a single inheritance hierarchy with abstract base class and three derived classes; implemented circular and linear linked lists using exclusively recursive algorithms
- Managed dynamic memory with Rule of Three (destructors, copy constructors, assignment operators); compiled warning-free with `-Wall` flag
- Built a menu-driven application for player rotation, challenge progression, and event scheduling with STL containers alongside custom data structures

CERTIFICATIONS

Google AI Professional Certificate — Google via Coursera | May 2026 | [Verify](#)

7-course program: AI Fundamentals, Prompt Engineering, AI for Data Analysis, Content Creation, App Building

Google AI Essentials — Google via Coursera | May 2026 | [Verify](#)

5-course specialization: Introduction to AI, AI Productivity Tools, Prompting Techniques, Responsible AI, AI Trends

AWS Certified Cloud Practitioner — Amazon Web Services | *In Progress* — Expected June 2026

ACTIVITIES & INVOLVEMENT

- Norse Hacks Hackathon Participant — Collaborated with a multidisciplinary team to design, build, and submit a working software product under 24-hour time constraints
- Portland State University Computer Science Program — Active student in the Maseeh College of Engineering and Computer Science, engaging in technical coursework and campus tech events
